

SG 960

FULLY AUTOMATIC SWITCHOVER MANIFOLD

The SG960 fully automatic switchover manifold for high purity gases. An integrated circuit board monitors and displays cylinder bank pressure and delivery pressure electronically. Change-overs occur automatically eliminating the need to manually reset levers or valves.

FEATURES

- Available with brass barstock regulators
- Micro controller monitors all functions and controls changeover
- Built to accommodate future cylinder expansion by adding header extensions
- Standard Audio/Visual Alarm
- Optional On-Site Telemetry
- Three Models: SG 960 HP, SG LE for liquid cylinders, SG 960 LAM for high delivery pressure
